# THE NEW SERENGETI RIFLE

## THE NEW SERENGETI RIFLE

KILIMANJARO QUALITY, BEAUTY AND ACCURACY AT A SEMI-CUSTOM PRICE

### THE NEW SERENGETI RIFLE

#### Kilimanjaro Quality & Beauty At A More Affordable Price

With new precision equipment, Kilimanjaro now has the ability to more affordably create our unique stock geometries in standard configurations from the finest American Walnut. For those hunters that cannot yet afford to treat themselves to the ultimate, full-custom experience of our flagship Kilimanjaro Rifle, the New Serengeti Rifle is our semi-custom offering at a substantially reduced starting price, but with all of Kilimanjaro's legendary quality, beauty, accuracy and Lifetime Guaranty.

Featuring our proprietary *Stealth Lamination* for superior strength and stability, the New Serengeti Rifle is available in your choice of virtually any chambering, right or left hand, Monte Carlo or straight comb, in any of our six most popular stock geometries, and in lengths of pull from 13.0 to 14.25 inches—over 6,000 different possible base configurations for your perfect rifle. Only at Kilimanjaro is such a wide-array of choices considered "semi-custom." For the ultimate full custom experience, the Kilimanjaro Rifle remains the pinnacle of the industry.

Create your own perfect New Serengeti Rifle in ten easy steps.

Simply choose:

- Your cartridge;
- The stock geometry that fits you best;
- Ebony, Ironwood or Rosewood wood accents;
- Monte Carlo or American straight comb;
- Left or right hand;
- Barrel length;

- Length of pull;
- Ceramic metal coating color;
- 1" or 30mm scope rings;
- Any extra price options or upgrades listed below.

#### The NEW Serengeti Rifle features:

##### Stealth Lamination:

Our proprietary *Stealth Lamination* provides greater strength and stability while preserving the full figure, grain and beauty of the wood. It provides all the stability of a synthetic stock but with the beauty, sound qualities and superior feel of fine walnut.

##### Action:

The Serengeti Action provides the best of the Mauser 98, Winchester Pre-64 and Sako actions in a premier hunting and dangerous game action. Available in both right and left hand versions, it features full controlled-round feed, a Mauser style claw extractor, and three-position shroud mounted safety. If you select our Tigercat Geometry (available only in right hand), your New Serengeti Rifle will be built around the lighter weight Kimber 84M or 84L actions, but which also feature full controlled-round feed, Mauser style claw extractor, and three-position shroud-mounted safety.

##### Chambering:

Virtually any cartridge chambering is possible, including most wildcats, from 22-250 up to 458 Lott.

### Barrel:

A free-floated, match-grade stainless steel Lilja barrel to your specification of length and rate of twist is standard.

### AAA Grade American Walnut Stock:

Your stock will be crafted from our selection of the finest AAA grade American Walnut. Based on the geometry you select, it will be carved and inlet using our new precision equipment. The final shaping and fitting is still done by hand under the supervision of our Master Gunsmith. Wood upgrades are available to Special Select Turkish walnut, or any of the Best Grade, Exhibition and Premier blanks shown on our website.

### Geometries:

The New Serengeti Rifle is available in any of our six most popular stock geometries and in either right or left hand configurations:

**The African:** Our elegant full-weight stock geometry suitable for all cartridges but especially the magnum cartridges from 7mm Rem. Mag. up to 458 Lott. Usually weighing in between 8 and 10 pounds without scope.

**The Walk-About:** Our delightful mid-weight stock geometry suitable for cartridges from 22-250 up to the lesser magnums. Usually weighing in between 7 and 8 pounds without scope.

**The Tigercat:** When less is more, the Tigercat geometry provides a slim, compact, lightweight rifle that once picked up, is very hard to put down. Suitable for the smaller cartridges up to the classic 30-06, it usually weighs in between 5.7 and 6.5 pounds without scope. (Requires Tigercat Action Upgrade and available in right hand only)

**The Merlin:** A classic full-size stock geometry perfected by the late Merlin "Mel" Smart during his 50-year career in stock-making. Suitable for all cartridges up to the largest magnums, it usually weighs in between 8 and 10 pounds.

**The Artemis:** Designed by women for women, the Artemis geometry is specially tailored to fit the female anatomy for more comfortable shooting and improved accuracy. Suitable for all cartridges, it usually weighs in between 7 and 9 pounds.

**The Artemis-Tigercat:** An adaptation of all of the unique Artemis design traits but in the delightfully light-weight Tigercat configuration, it usually weighs in around 6 pounds. (Requires Tigercat Action Upgrade and available in right hand only)

With the exception of the Artemis geometries, which utilize the

special Artemis comb, each of these geometries is available in

your choice of a Hunter Monte Carlo comb, or an American style straight comb.

### Deluxe Wrap-Around Checkering:

Deluxe, fine-line wrap-around checkering—all done by hand—is standard. Our trademark Diamond Fleur Checkering and other checkering patterns are available as options.

### Exhibition Grade Wood Finish:

Our Exhibition Grade Wood Finish comes standard on the New Serengeti Rifle and is second in quality and beauty in the industry only to the premier Museum Grade finish of our Kilimanjaro Rifle. Designed specifically for rugged field use, and to keep looking beautiful year after year in the harshest of conditions, it is a hand-rubbed tung-oil/polyurethane finish applied and seasoned utilizing the special procedures developed during our extensive R&D efforts. Our premier Museum Grade wood finish is available as an option.

### Ceramic Metal Coating:

Premium ceramic metal coating is standard in your choice of colors, providing excellent metal and corrosion protection in an elegant non-glare finish for field use.

### Quality Assurance:

Rigorous quality assurance throughout the production process is provided with multiple pre-final and final inspections, and final accuracy testing for 1 MOA or better.

### Delivery Package:

Your New Serengeti Rifle comes complete with a premium Kilimanjaro soft case embroidered with the Kilimanjaro logo, and ready for the toughest field conditions.

### Other Features:

The New Serengeti Rifle also comes standard with: bolt jewellery; shadow-line cheek piece; two action cross-bolts; Ebony, Ironwood or Rosewood fore-end tip, grip cap, and cross-bolt caps; Dakota style in-let swivel studs; Pachmayr Decelerator recoil pad; and Leupold scope rings & bases. Many other options are available on request.
